

WIREMESH TRANSFER

Span Tech's Wire Mesh Transfer is perfect for avoiding sticky situations.

Drive Options

Wire Mesh Transfer can be slave driven or independently driven.

Innovative Design

Wire Mesh design makes it perfect for near freezers or in sticky areas.

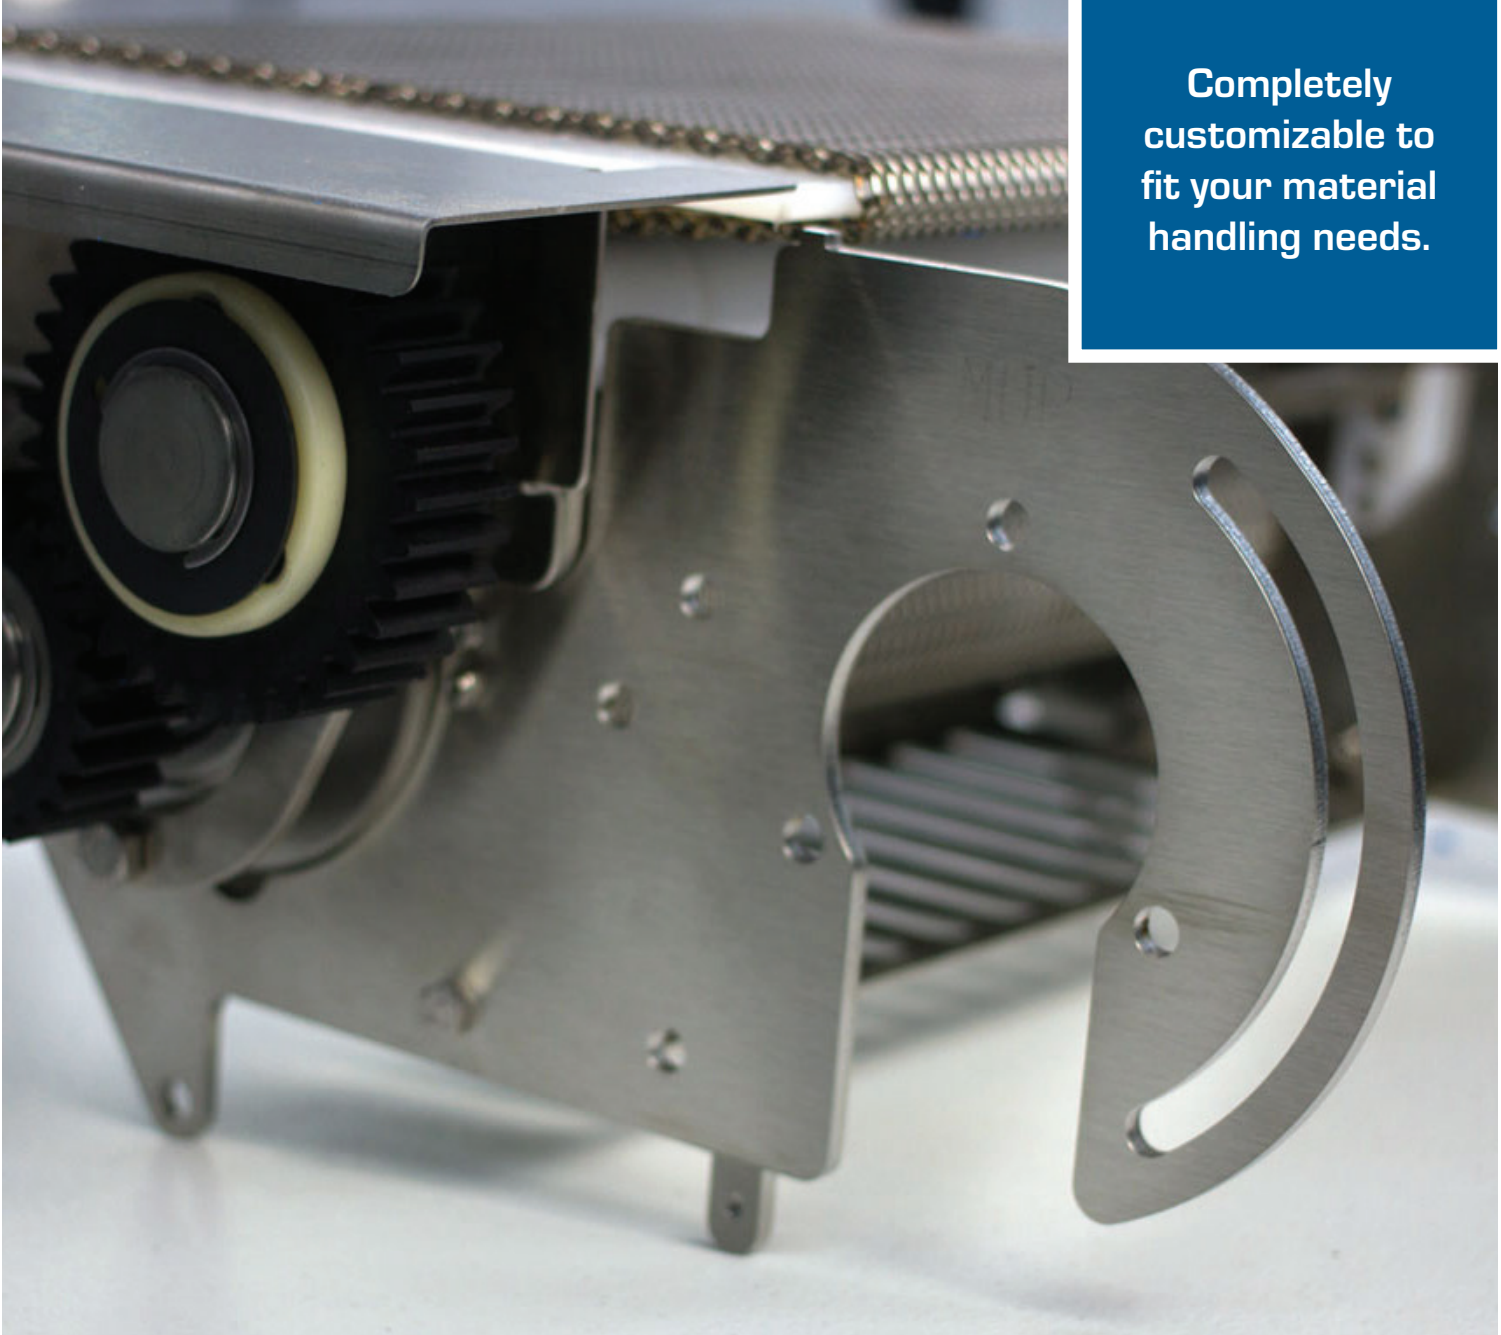

Configurable

Inner module can be removed without tools for fast change out.

Recommended For:

Food & Beverage Production

Completely
customizable to
fit your material
handling needs.

The Wire Mesh Transfer shares many similarities to the MicroSpan Transfer with the added feature of being able to be used in or near freezers. The Wire Mesh Transfer can handle sticky or gummy products and can be used in bi-directional applications.
