

# PILLOW TOP

Span Tech's Pillow Top chain handles the most delicate products, while offering one of the tightest turning radius on the market.

## No More Chordal Action

Pillow Top chain dramatically reduces chordal action meaning top-heavy products are less likely to tip over during transfer.

## Top-notch Turn Radius

Offers one of the tightest turning radius in the industry for chain width.

## Transfer Position

Transfers can be placed directly against the chain resulting in the successful transfer of very small products.

## Small Footprint

The tight turning radius allows for a smaller footprint allowing easy placement around existing structures or machinery.

## Recommended For:

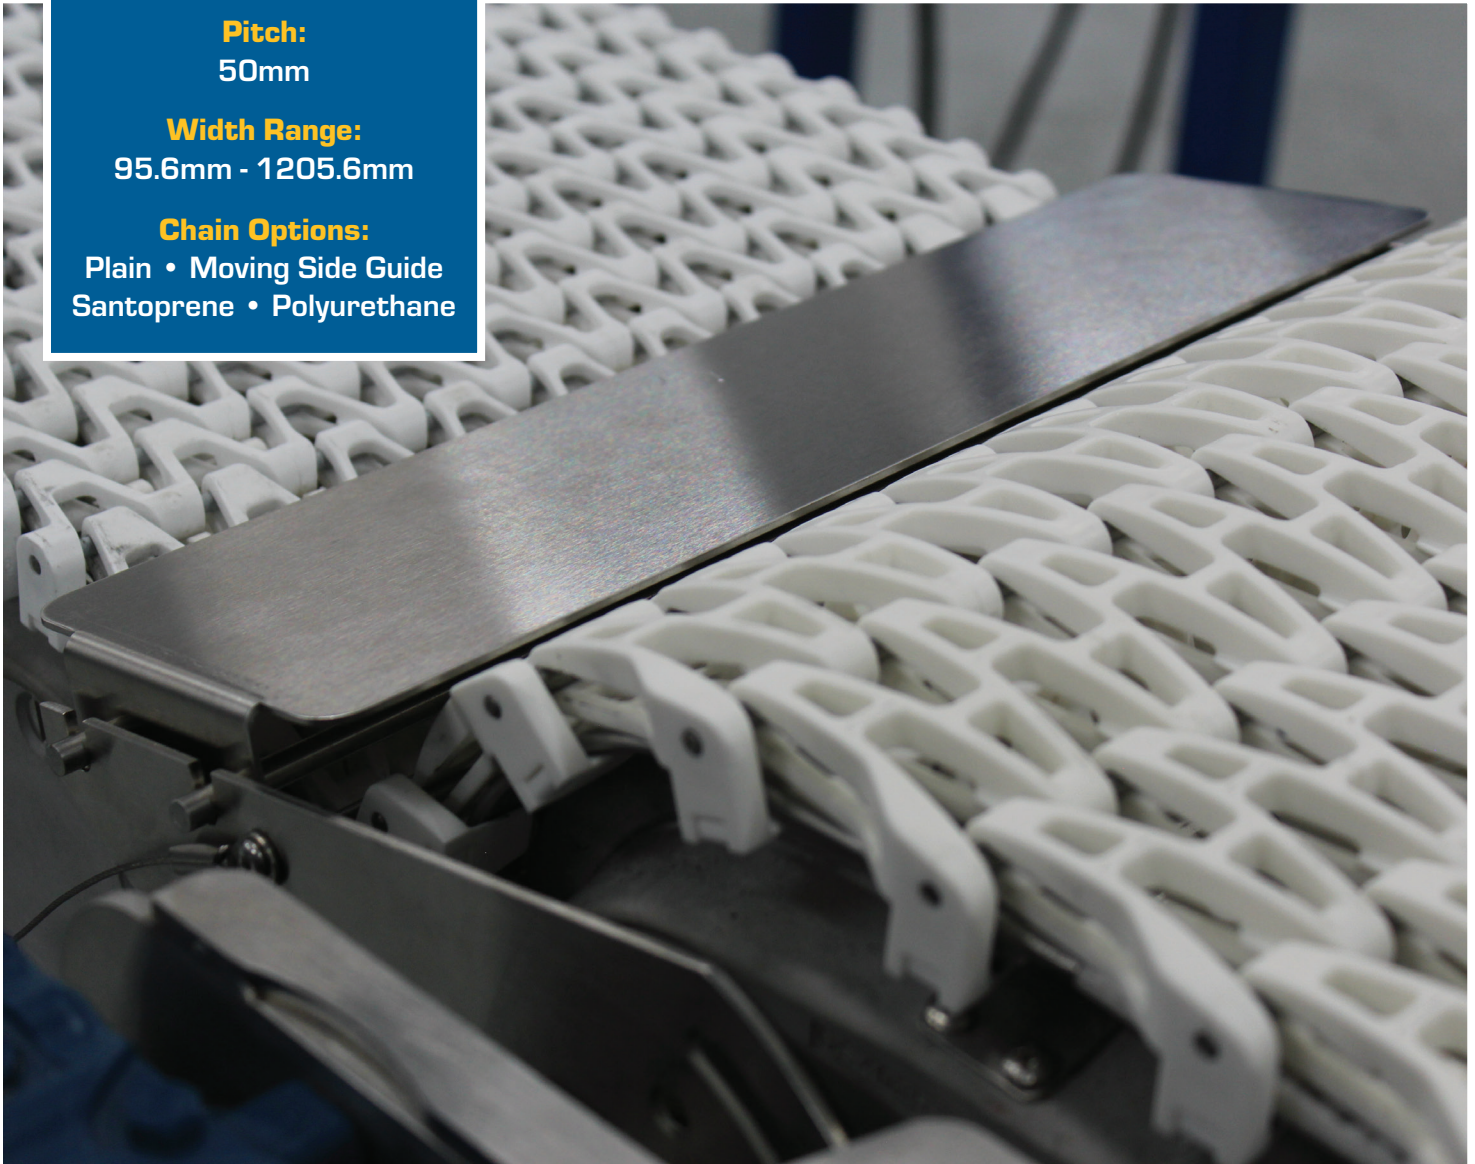

Food Production

**Pitch:**  
50mm

**Width Range:**  
95.6mm - 1205.6mm

**Chain Options:**  
Plain • Moving Side Guide  
Santoprene • Polyurethane

Perfect for food production facilities, Pillow Top chain conveyors handle the most delicate products with ease and precision. The innovative Pillow Top design eliminates the need for a powered transfer unit and allows the conveyor to sit very closely to the transfer unit. This results in successful transferring of very small products that could otherwise get caught or snagged in more traditional transfers.
