

SIDE WALLS

Functionality

Functions as guide for products on the conveyor and to guard against the moving sides of the conveyor chain.

Durability

- UHMW sidewalls offer the lowest amount of friction and will not crack or scratch.
- Lexan sidewalls are the lightest
- Stainless steel sidewalls offer the highest durability.

A perfect safety component for both products and employees.

Recommended For:

Beverage Production

Completely
customizable to
fit your material
handling needs.

Side Walls can be customized to fit your specific applications and are an effective way to guard against the moving sides of the conveyor chain. Based on your needs, sidewalls are available in stainless steel, UHMW, and Lexan.
